

ПР7

Задание 2

```
int kol = 0;
Console.WriteLine("Введите количество");
kol = Convert.ToInt32(Console.ReadLine());
if (kol > 0)
{
    show(kol);
}
else
{
    Console.WriteLine("Указано некорректное число");
}
Console.ReadKey();
}
public static void show(int kol)
{
    int fib = 0;
    int fib_pp = 0;

    for (int i = 1; i <= kol; i++)
    {
        if (i == 1)
        {
            Console.WriteLine("[1]\t 1");
        }
        else if (i == 2)
        {
            fib_pp = 1;
            fib = 1;
            Console.WriteLine("[2]\t 1");
        }
        else
        {
            int new_fib = fib + fib_pp;
            Console.WriteLine("[{0}]\t {1}", i, new_fib);
            fib_pp = fib;
            fib = new_fib;
        }
    }
}
